NEW DAILY

THE MINIBUS THAT WILL CHANGE YOUR BUSINESS PERSPECTIVE

Once again, the Daily Minibus is ahead of the pack, anticipating your needs to future-proof your business.

The Daily Minibus is designed to help you move your passengers sustainably.

In a fast-changing world where automation plays an increasing role, the Daily makes great progress on the path towards autonomous driving and in enhanced safety features.

Throughout its 40-year history, the Daily has continuously made advances to always provide a first-class environment for driver and passengers. True to its heritage, it raises the travelling and driving experience to the highest levels in the industry.

The Daily embraces Connectivity to unlock a whole new world of highly personalised services precisely tailored to match your use of the vehicle and your requirements.

RUN YOUR BUSINESS WITH POWER AND EFFICIENCY

The Daily's focus on efficiency delivers a further step towards zero-carbon transport hand in hand with fuel economy that will benefit your bottom line and the top-class performance you need to complete your mission effectively. Design improvements and longer oil change intervals will reduce your maintenance costs, adding to your profitability.

The Daily Minibus is the only vehicle in its category to use industrial-original Diesel engines, which are optimized for heavy use, and can achieve high mileages whilst maintaining maximum efficiency: the 2.3-litre F1A engine with rated power 160 hp and the 3.0-litre heavy-duty F1C engine, offered in 2 different power ratings in Diesel version (180 hp and 210 hp).

The 3.0-litre engine is also available in a Compressed Natural Gas version, which results in a clean-running and remarkably quiet vehicle.

DAILY HI-MATIC. ABSOLUTE DRIVING PLEASURE.

Drive in comfort with the first 8-speed automatic gearbox. Drive safely as you stay focused on the traffic and driving conditions with the ergonomic multifunctional shift lever, and enjoy absolute driving pleasure.

Power your business with best-in-class performance.

At the top of the range, the Daily HI-MATIC with the 3.0-litre FIC engine delivers a powerful 210 hp with 470 Nm torque.

Sustainable driving pleasure powered by Natural Gas.

The HI-MATIC absolute driving pleasure is available across the Daily Natural Power range, offering all the performance, efficiency and comfort benefits of the Daily HI-MATIC together with the sustainability and low TCO of IVECO's Natural Power technology.

On the top of this, the Daily Minibus, equipped with HI-MATIC automatic gearbox, can be fitted with an electronic retarder a winning combination which enhances safety on hilly and mountainous roads.

Electronic control allows for two operating modes, which are functional to the specific mission needs:

- + **ECO** – for smooth, low-speed gear shifting to enhance comfort and keep fuel consumption low.
- + **POWER** – for faster, higher speed gear shifting to achieve more precise gear engagement and a sporty driving style.

HI MATIC

ASSISTED DRIVING AND SAFETY

ENJOY SAFE, STRESS-FREE DRIVING

The Daily Minibus makes significant advances on the path towards autonomous driving and safety with the introduction of a complete set of Advanced Driver Assistance Systems. These advanced technologies are at your service: they enable you to fully focus on your job, which requires an increasing degree of multitasking, in full safety. They reduce the risk of accidents on motorways and busy city streets, help you in tricky situations and take the stress away in heavy traffic – to the benefit of quality of life of your passengers on board and of your driver.

AVOID COLLISIONS WITH AEBs AND CITY BRAKE PRO

The **Advanced Emergency Braking System (AEBS)** helps keep you safe by detecting a potential collision ahead and braking autonomously. It prevents collisions at speeds below 50 km/h, and drastically mitigates the damage at greater speeds. In busy traffic, the **City Brake PRO**, will help you to avoid also collisions at speeds as low as 5 km/h. Both systems offer three settings, which can be selected by the driver on the steering menu. Fleet Managers have the option to set and lock the function's settings.

STRESS-FREE IN HEAVY TRAFFIC CONGESTION

In rush hour congestion, you can activate **Queue Assist** at the touch of a button, set the safety distance you want to keep, and the Daily Minibus will stop when the car ahead stops. When the car moves off, a light touch on the accelerator will get your Daily Minibus going again. Rush hour stress will be a thing of the past!

CRUISE SAFELY ON THE MOTORWAY

It can be difficult to stay alert during long drives on motorways; **Adaptive Cruise Control** helps you stay safe. You set your cruising speed and minimum distance from the vehicle ahead. If the vehicle in front slows down, the system reacts and autonomously reduces your speed to maintain the safety distance until the other vehicle moves away or speeds up.

ALWAYS STAY IN YOUR LANE

The Daily Minibus also helps you stay in your lane with the **Proactive Lane Keeping Assist** system, which gently **steers** you back to the centre of the lane if you drift out. You can set the distance you wish to keep from the painted lane marking and the **stroke intensity** on the steering system.

STABLE IN CROSSWINDS

Strong winds when driving on a bridge or overtaking heavy trucks are no challenge with the Daily Minibus' **Crosswind Assist**, which stabilises the vehicle against a powerful gust of side wind. The sensors activate the brakes on the side of the vehicle hit by the wind, ensuring its stability and your safety.

DRIVE SAFELY DOWN STEEP SLOPES

Driving a loaded van down a long, steep slope can be daunting, but with the Daily Minibus you won't think twice about it. It is the only van in the market with **Hill Descent Control (HDC)** on Rear Wheel Drive, that maintains a steady speed by autonomously operating the brakes, helping you drive downhill slowly and safely.

GET A GRIP

Slippery surfaces such as mud, sand or snow are no challenge for the Daily Minibus: **Traction Plus** is activated at the push of a button and will keep a firm grip in all conditions, helping you in difficult situations. It is available on the Rear Wheel Drive – a first in the industry for this type of vehicle.

ON-BOARD LIVING AND DRIVING EXPERIENCE

TECHNOLOGY AT YOUR SERVICE

The Daily Minibus uses technology to provide a superior driving experience and the perfect working environment. Life on board is easier, more comfortable and more productive than ever.

SMOOTH, EFFORTLESSLY MANOEUVRABLE

The **new Electric Power Steering** is very precise and reactive to the driver's inputs, reducing the steering effort and providing a smooth driving experience. It also damps vibration and compensates for drift and wheel unbalances, resulting in a feeling of great stability and control.

You can also activate the **unique City Mode** feature with the touch of a button to further reduce the effort required to steer by as much as 70% and enjoy ultimate driving pleasure even in busy city centre streets.

SUPERIOR DRIVING COMFORT AND ERGONOMICS

The Daily Minibus' entire steering system has been redesigned to give you the on-board living experience of a passenger car. You can make both axial and angular adjustments to the steering wheel and set up the perfect driving position for better comfort and ergonomics. The smaller, leather multifunctional steering wheel puts a wide range of controls at your fingertips and leaves more leg room, adding to your overall comfort.

EASY, CLEAR INTERACTION

The new **high-resolution colour display cluster** provides a user-friendly, intuitive interface that makes it extremely easy to interact with your Daily Minibus and access in real time all the key settings and information you need to get the best from your vehicle.

SAFETY AND EFFICIENCY WITH REAL-TIME TYRE PRESSURE MONITORING

The **Tyre Pressure Monitoring System** displays the pressure of each tyre in real time on the cluster, so you can ensure your Daily Minibus is always running on optimal tyre pressure. This not only results in safer driving, but also helps you reduce your fuel consumption.

HI-CONNECT: THE NEW INFOTAINMENT SYSTEM

The Daily Minibus features a **user-friendly infotainment system** with a 7" screen, DAB Radio, Driving Style Evaluation, voice recognition, TomTom® car and truck navigation system, and rear camera display.

You can easily bring your digital life on board with Apple CarPlay and Android Auto™, which enable you to mirror your device and enjoy your apps in full safety while driving.

HIGH VISIBILITY LED

The **new full LED lights** significantly improve visibility and obstacle perception by 15% with a much sharper beam that carries further. While making a strong design statement you will also enjoy savings on your Total Cost of Ownership, as the LED lights have an extremely long life. No distractions, no effort.

PARKING COMFORT AND EFFICIENCY

The new **Electric Parking Brake** automatically engages when parked and disengages when you are ready to drive away.

In multi-stop missions, especially during the city transport and line services, you don't have to waste time engaging and disengaging the brake. This not only will reduce arm fatigue and discomfort from repetitive movements, it will also improve your productivity. You can save up to 5 hours a month, a definite benefit for your profitability.

With the electric passenger doors the Electric Parking Brake it's also automatically engaged by the door opening.

Eliminating the hand brake lever frees up space in the cabin so you can move across more comfortably and have an additional storage box for the driver.

ENHANCED CONNECTIVITY AND SERVICES

ENTER THE DAILY MINIBUS' CONNECTED WORLD OF SERVICES

On the Daily Minibus, connectivity is much more than using your mobile device onboard. It is the enabler of a whole range of services that allows us to support your business more proactively and effectively, minimising stoppages and maximising your productivity.

IMPROVED UPTIME

The Daily Minibus' connectivity will increase your time on the road by putting the vehicle in direct contact with the IVECO Control Room, where a dedicated team of IVECO specialists receives real-time data directly from your Daily Minibus and monitors them constantly. They can conduct diagnostics remotely and update your vehicle's software with no downtime. They can identify issues before they occur and take preventive actions – in some cases they can even resolve them remotely, keeping your vehicle running without stoppages.

OPTIMISE YOUR DAILY'S EFFICIENCY

As a connected customer, you can manage your vehicle in real time through MYDAILY, which puts you in contact with your Daily Minibus while sitting at your desk on the web portal or on the move on your mobile device with the MYDAILY app.

You can monitor your vehicle continuously, analyse its performance, fuel consumption, and your driver's driving style, and plan the vehicle's service interventions to push your fleet's efficiency to its maximum.

Your Daily Minibus will also regularly send you a Smart Report on its performance and fuel consumption, with tips and suggestions on how you can improve the driving style to take good care of the vehicle and save fuel.

FLEET MANAGEMENT SOLUTIONS

The Daily Minibus offers a comprehensive Fleet Management Solution that will enable you to reduce expenses with better vehicle tracking, fleet utilisation, driver behaviour, advanced engine diagnostics and real-time mileage reporting.

If you already have your own Fleet Management system, the Daily Minibus' connectivity will provide you with all the data through its Web API interface, which will ensure your vehicle interacts seamlessly with your system.

DAILY BUSINESS UP™: YOUR DRIVER AND BUSINESS ASSISTANT

DAILY BUSINESS UP™ is the simple way to keep your business connected. Once you've downloaded the DAILY BUSINESS UP™ on your device and paired it with the DAB radio, you can enjoy the features that will help you improve your productivity and efficiency.

DAILY BUSINESS UP™ is your driver assistant through features such as Driving Style Evaluation, and is your business assistant organizing your fleet maintenance and monitoring performances on the MYDAILY portal.

THE DAILY MINIBUS GETS THE JOB DONE WITH STYLE

The Daily Minibus has always been popular for its looks – but with the new Daily Minibus, design always goes hand in hand with function. It has been designed with attention to detail, and every element serves a purpose. With your new Daily Minibus, you go about your business, completing your people transport mission efficiently and profitably!

STYLISH AND FUNCTIONAL DASHBOARD

The elegant dashboard with its sweeping lines and the new high-resolution colour display cluster and the HI-CONNECT multifunctional screen positioned at the centre puts all the information and controls you need within easy reach.

HI-CONNECT

The new HI-CONNECT infotainment with 7" screen makes it easy to mirror your device with Apple CarPlay and Android Auto™ and bring your digital life on board.

HIGH VISIBILITY LED

The new full LED lights make a strong design statement while significantly improving visibility, with a sharper beam that carries further. You will also enjoy savings on your Total Cost of Ownership, as the LED lights have an extremely long life.

COST-SAVING DESIGN: 3-PIECE BUMPER

Bumpers are easily damaged on urban missions and in busy traffic, and the cost of repairing them can build up. The modular 3-piece design means that you don't always have to replace the entire bumper: in 90% of cases only the damaged section is replaced, with consequent significant savings on repair costs.

NEW FRONT GRILLE

The new, wider front grille increases ventilation while protecting the engine and radiator. The new hot stamping process makes it tough and extremely durable.

EXCELLENT COMFORT

The Daily Minibus offers a wide range of solutions in terms of passenger comfort: attractive interior design, new seats fabrics and floor covering for Line and Start range, air conditioning and diffusion systems delivering an outstanding comfort.

ENDLESS OPPORTUNITIES

A DAILY MINIBUS FOR EVERY NEED

The extensive range of the Daily Minibus is able to meet a wide variety of requirements for different passenger transport missions:

Tourist mission for traveling with comfort and style, intercity mission with a category-leading passengers capacity, shuttle buses and school buses specifically designed for student transport.

In total, the new Daily Minibus is available in more than 380 factory versions for built up models, resulting from the combination of its product variants: types of wheelbase, gross vehicle weight levels, different power outputs, gearboxes, suspensions and height.

SUSTAINABLY POWERFUL

The Daily Minibus is more powerful and environmentally friendly with the new 210 hp engine, and offers a choice of different engine types: Diesel, Natural Power.

THE STYLISH COMFORT OF A DAILY JOURNEY

With the innovative styling of the exterior and the new interiors, passengers travel in a stylish environment enjoying luxurious comfort.

UNLIMITED VERSATILITY

The extensive line up of the Daily Minibus, which can carry up to 22 passengers, means there is a model for every people transport mission:

- **Tourist mission** for travelling with comfort and style
- **Intercity mission** with a category-leading passenger capacity
- **Shuttle buses** for airport and hotel services
- **School buses** specifically designed for student transport

DAILY BLUE POWER

The Daily Blue Power range refers to commercial vehicles and minibuses powered by alternative tractions.

SUSTAINABILITY CHAMPION

For people transport, Daily Blue Power covers a wide variety of missions: shuttle buses in central urban environments, students transport and line services. The attractive design of the blue font grill makes Blue Power minibuses immediately recognizable.

BEST COMFORT AND SAFETY

The exclusive 8-speed HI-MATIC automatic gearbox is designed to ensure maximum performance, minimal running costs, unbeatable comfort and superior gear changes, along with reduced fuel consumption.

NO LIMITS IN URBAN AREAS

The dramatic reduction in noise level -4 dB lower than its Diesel equivalent – makes it an extremely quiet and clean-running vehicle, which is great benefit in urban areas with low emission zones.

UNRIVALLED PERFORMANCE

Thanks to its sustainable Natural Power technology, the Daily Minibus Natural Power delivers the same performance and transient response as its Diesel equivalent. The 3.0 litre engine, with its 136 hp and the best-in-class 350 Nm torque, can tackle all missions.

OUTSTANDING FUEL ECONOMY

The Daily Minibus Natural Power benefits from the significantly lower pump price of CNG, which results in very competitive cost per km, up to 35% savings compared to Diesel.

A DAILY FOR EVERY BUSINESS

A COMPLETE RANGE FOR PASSENGER TRANSPORT

The Daily range offers a wide variety of enhancements and versatility for body building, featuring an extensive choice of solutions and load capacity ranging from 4.5 to 7.2 tonnes. It is the ideal base for building a Minibus thanks to its outfitting simplicity and the exceptionally robust truck-derived chassis, its heavy-duty and durable transmission and the HI-MATIC 8-speed automatic gearbox.

In addition, the 3.0-litre engine in Diesel and CNG models ensures outstanding reliability.

The Daily chassis offer for bodybuilders includes the chassis cowl, the stripped chassis cowl, the cut away and the cab versions with GVW up to 7.2 tonnes.

The Daily windowed and panel van offer for bodybuilders includes different wheelbases: 3520, 3520L, 4100, 4100L.

IVECO BUS continue to strength the Daily Minibus offering with its network of Certified bodybuilder under the BUSMASTER program, the international platform dedicated to the passenger transport bodies and conversions based on IVECO BUS vehicles, guaranteed by our certified BUSMASTER bodybuilders. With ready-to-use chassis and vans, IVECO BUS meets every requirement for passenger transport, while offering customized after-sales service and quality thanks to its network of certified coachbuilders.

ELEMENTS

PICK THE SERVICES THAT PERFECTLY MATCH YOUR BUSINESS

The Daily Minibus offers an extensive range of services that can be tailored to your precise requirements to keep your vehicle running in top form and your business operating with a healthy bottom line.

The Daily Minibus introduces an entirely new level of customisation through connectivity. The real-time vehicle data it provides, enables us to offer you **bespoke maintenance plans** based on the real use of your Daily Minibus – a perfect match to your business.

Alternatively, our **ELEMENTS** range offers the extreme **flexibility** that enables you to choose the combination of Planned Maintenance and Extended Warranty services for your business, and further enrich your package with the Additional Coverage Elements.

The major “ELEMENTS” making up the offer (Maintenance, Drive Line, Extra Drive Line, Wear) can be combined together in order to create the contract that perfectly suits your business. The table below summarises all the possible combinations:

MAINTENANCE

- Maintenance
- Lubrication
- Oil and fluid changes according to the maintenance and repair handbook

DRIVE LINE

- Engine
- Fuel injection
- Gearbox
- Propeller shaft and axle repairs

EXTRA DRIVE LINE

- Components not already covered by the drive line element e.g. Electrical System

WEAR

- Clutch
- Brake pads
- Brake discs
- Brake drums
- Brake linings for drum brakes

For inclusions / exclusions please refer to contractual documents relevant to your Market.

ELEMENTS contracts are applicable for built up Minibuses only.

IVECO SERVICES

IVECO CAPITAL

IVECO CAPITAL is the financial services brand of IVECO and offers a full range of financing, leasing, rental and ancillary services for commercial vehicles – extended warranty, maintenance and repair services, and various types of insurance can be included in the pack.

All financial packs can be tailored to the customers' needs and apply to all types of vehicles - new or used, and conversions.

IVECO CAPITAL provides customers with professional advice to select the financial product that is the best match for their business financial and fiscal requirements.

For more information, please contact your IVECO dealer.

IVECO
0080048326000
Assistance Non-Stop

IVECO ASSISTANCE NON-STOP is just a phone call away 24 hours a day, 7 days a week to keep your Daily and your business running.

IVECO NON-STOP is the original IVECO smartphone application that you can use to communicate with IVECO if your vehicle breaks down

Just insert your vehicle information (VIN and registration plate) and with a simple push of a button you can send a request for assistance to the IVECO Customer Center. We will take care of your request immediately, activate the nearest workshop and follow up on the vehicle's repair. Through the app you can receive updates on the progress of your vehicle's assistance.

IVECO BUS FAN SHOP

IVECO BUS FAN SHOP

You can choose from a range of IVECO BUS work and leisure clothes, stationery and gadgets at your dealership or at the IVECO BUS online store www.ivecobusfanshop.com.

IVECO BUS | Genuine Parts HIGH PERFORMANCE

IVECO BUS GENUINE PARTS

will keep your Daily running reliably during its long years at your service - and cost efficiently. The wide offering ranges from new and remanufactured parts to servicing kits and telematics solutions. IVECO BUS operates a network of 7 Parts depots and uses advanced technologies to guarantee 24/7 deliveries across Europe.

IVECO BUS is a brand of CNH Industrial N.V., a global leader in the capital goods sector that, through its various businesses, designs, produces and sells agricultural and construction equipment, trucks, commercial vehicles, buses and specialty vehicles, in addition to a broad portfolio of powertrain applications. It also distributes high performance genuine parts for all CNH Industrial Commercial Brands.
